

Applied Productivity Tools using Spreadsheet

LEARNING OBJECTIVES

At the end of the lesson, you are able to:

- Explain what a spreadsheet is.
- Create a table of data and format it using Microsoft Excel
- Recognize the importance of using Microsoft Excel

Activity: Jose's Budgeting

Income	Amount	
Parent's Allowance	Php	500.00
Salary		5 000.00
Extra Income		300.00
<i>Total</i>	Php	5 800.00

Activity: Jose's Budgeting

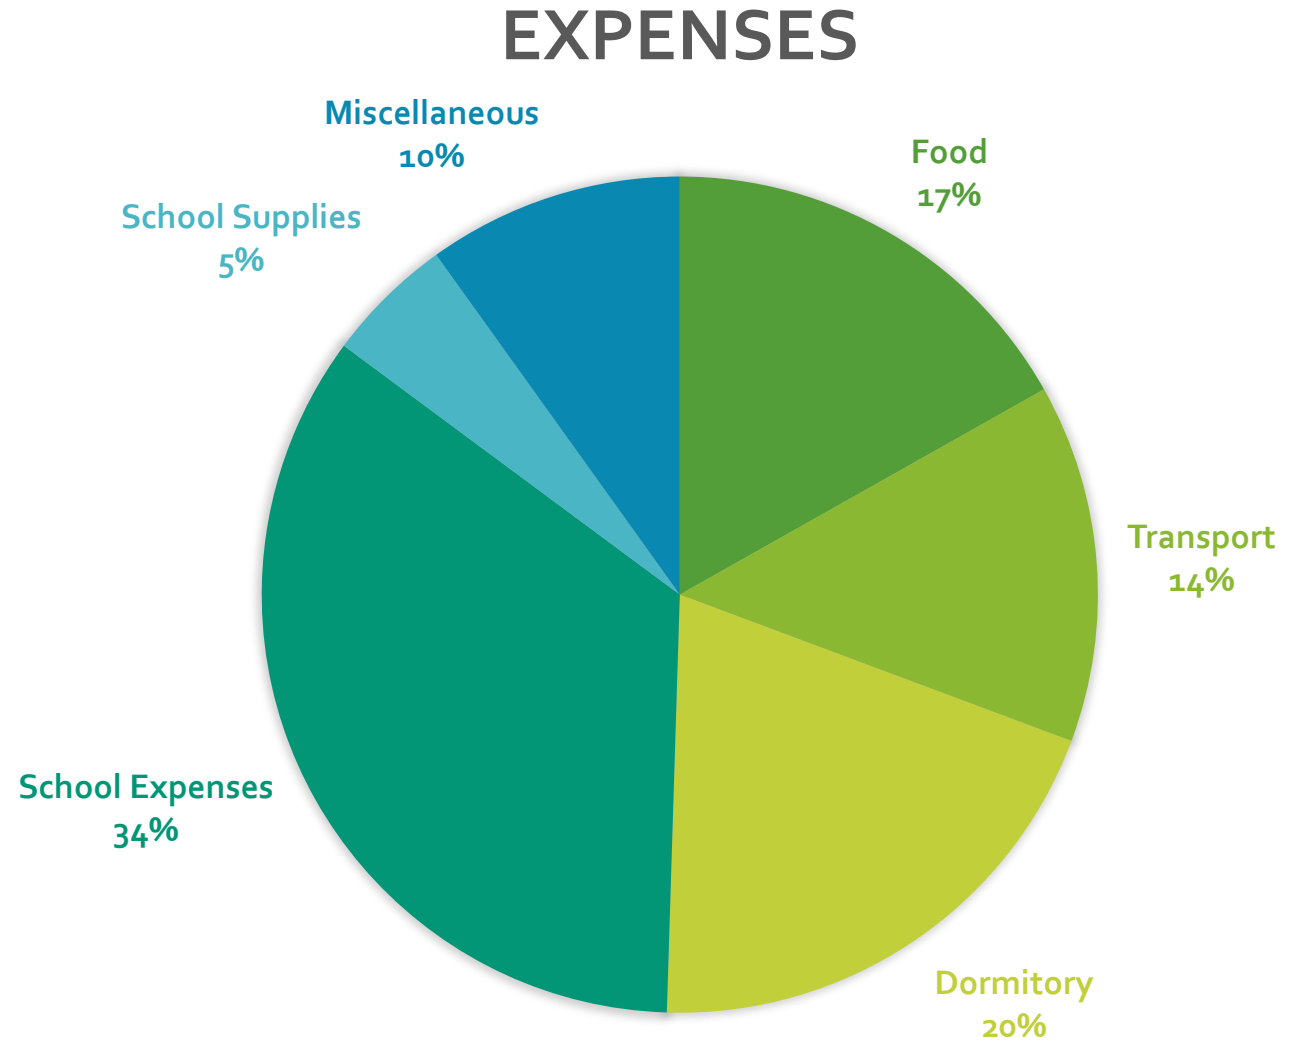

Expenses	Amount	
Food	Php	850.00
Transport		700.00
Dormitory		1 000.00
School Expenses		1 750.00
School Supplies		250.00
Miscellaneous		500.00
Total	Php	5 050.00

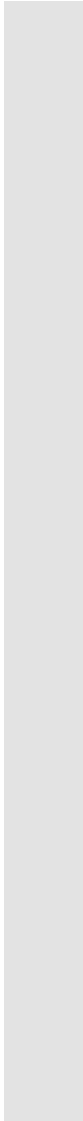

Task: Create a pie chart to show Jose's expenses for the month.

Activity:
Jose's
Budgeting

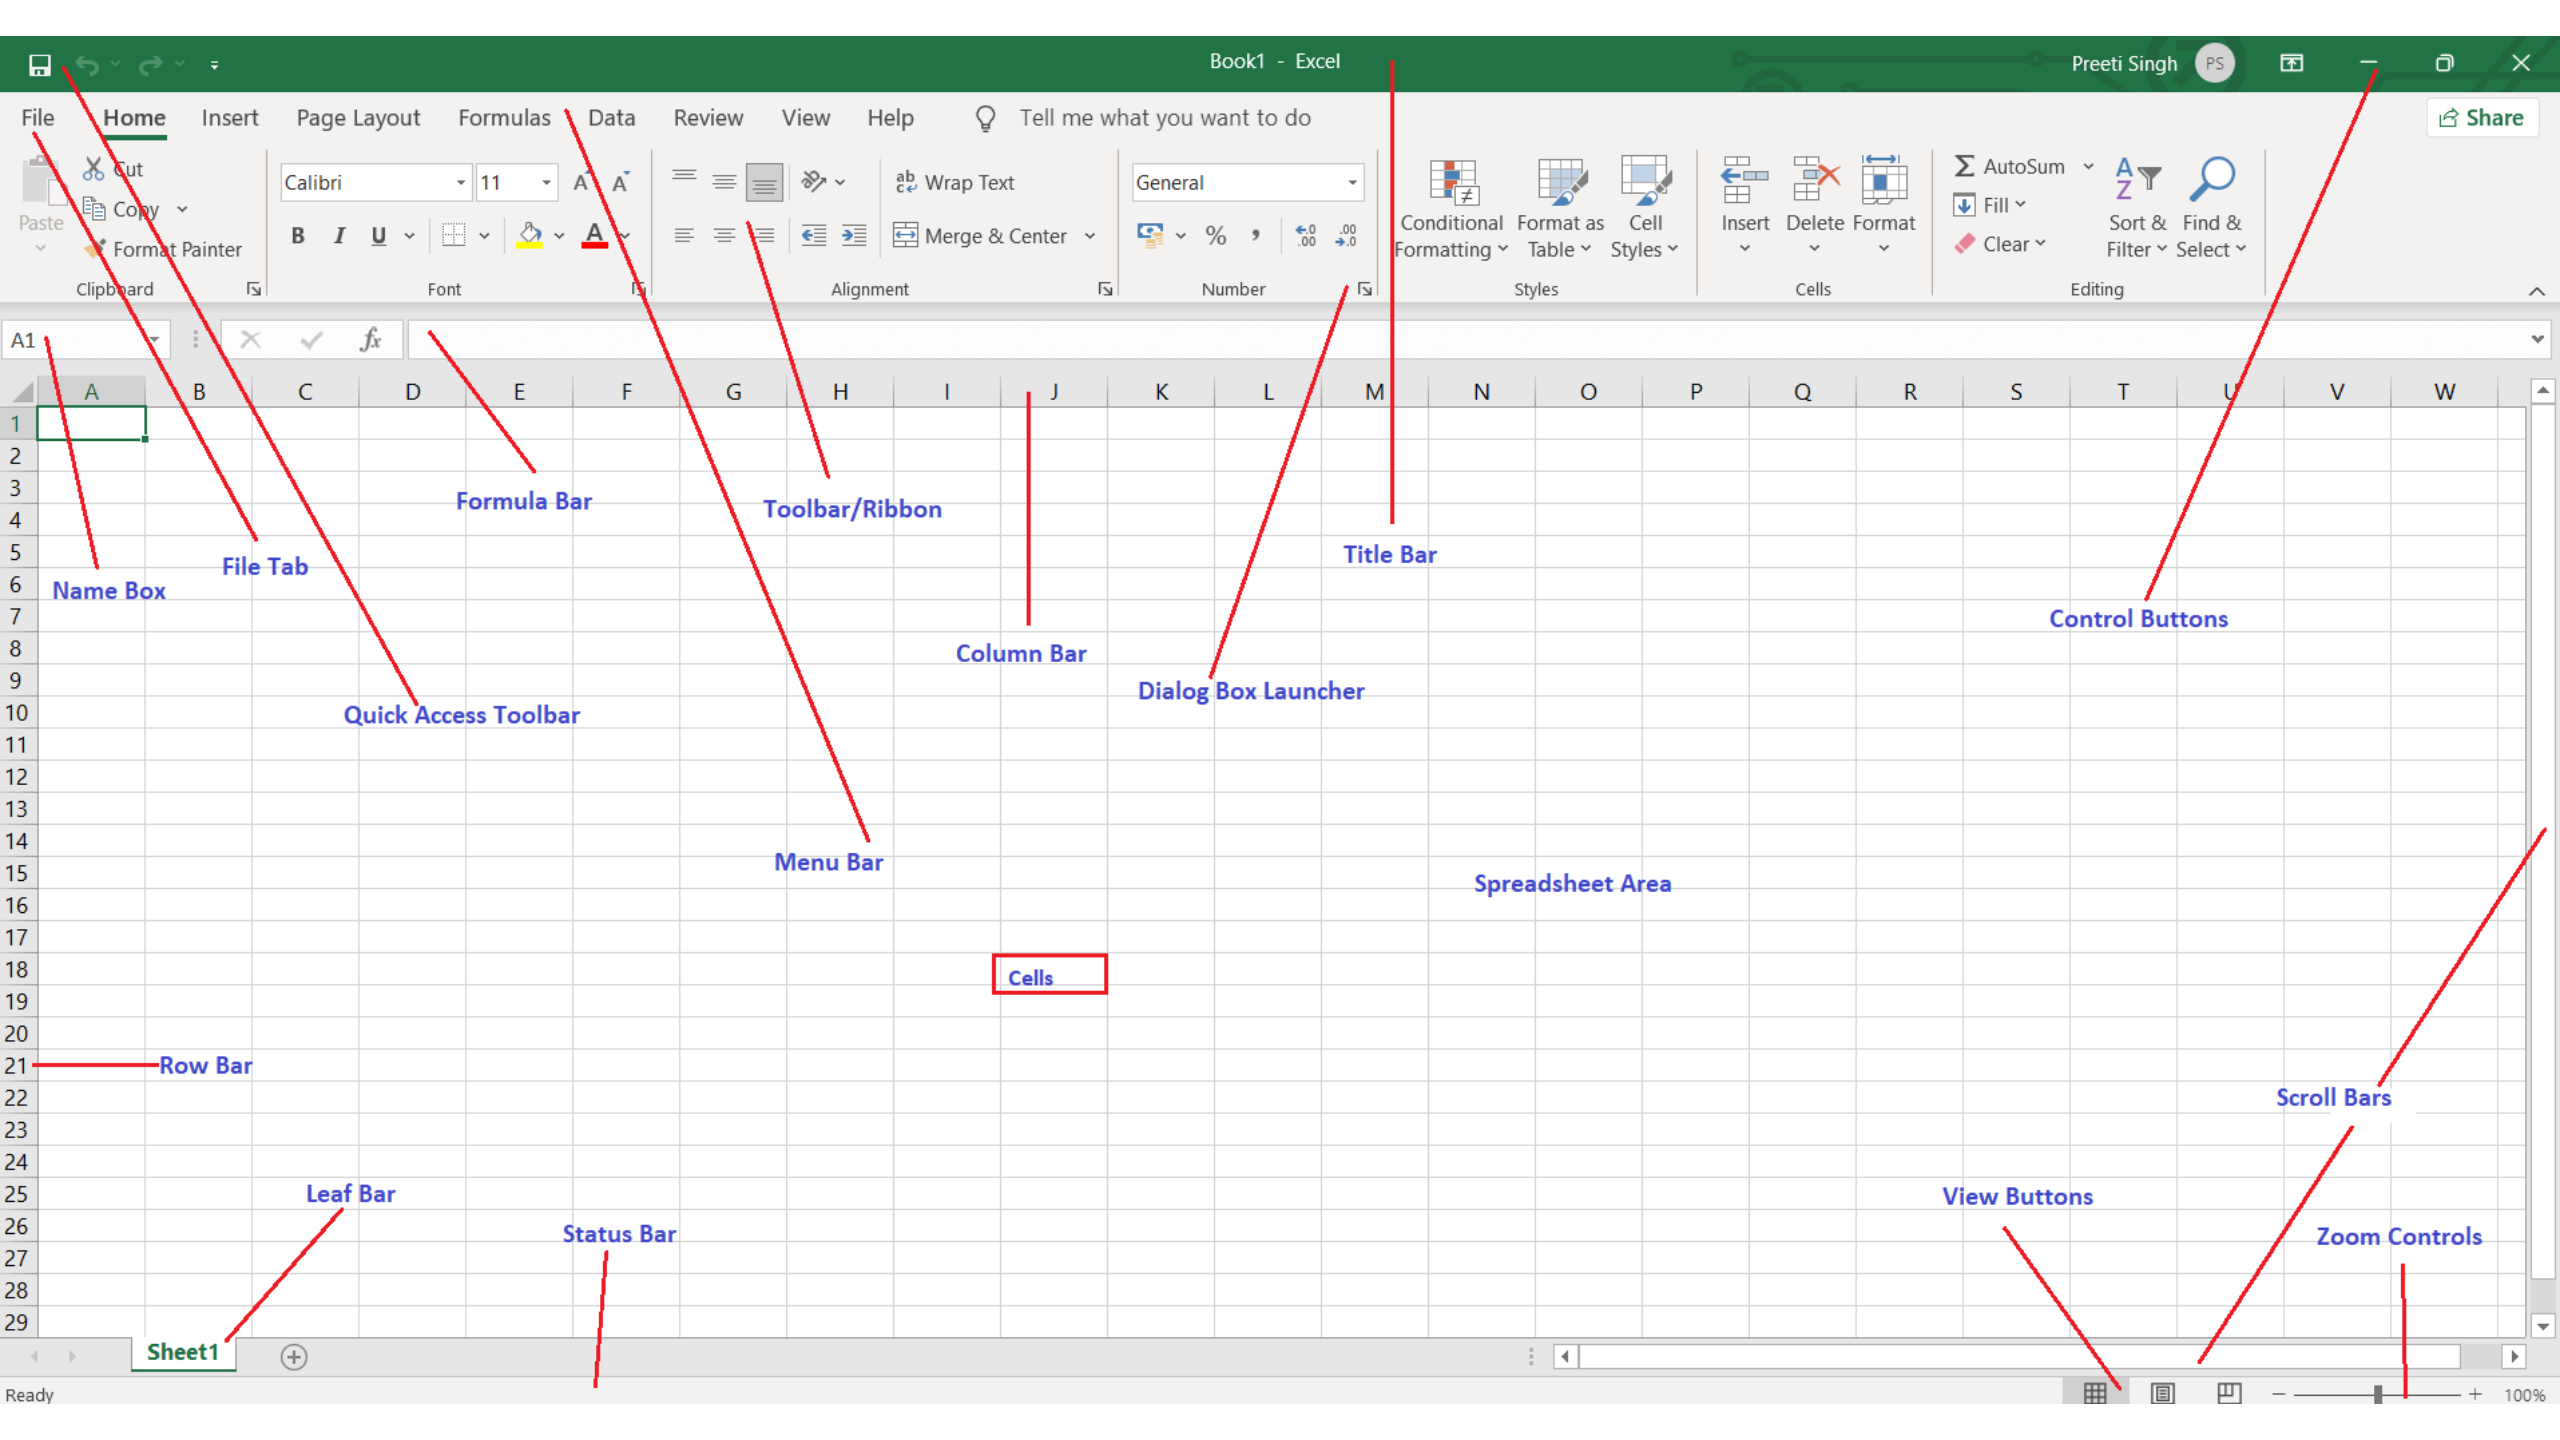

Expenses	Amount		Percentage (%)
Food	Php	850.00	16.83
Transport		700.00	13.86
Dormitory		1 000.00	19.80
School Expenses		1 750.00	34.65
School Supplies		250.00	4.95
Miscellaneous		500.00	9.91
Total	Php	5 050.00	100

Jose's Expenses for the Month

SUM () Function

- The **SUM () Function** allows to sum the numerical data in any number of columns or rows by selecting them or typing them in.
- The basic format of this function is **=SUM(*sum_range*)**

*A **range** refers to the group or array of cells.*

COUNT () Function

- The **COUNT () Function** is used to count the number of chosen cells that have a number value in them. This is useful in determining if there are missing data or values.
- The basic format of this function is **=COUNT(*range to be counted*)**

MS Excel Demo.xlsx | General | Upload Pending | Search | Shiela Mae Cas | Comments | Share

File | Home | Insert | Draw | Page Layout | Formulas | Data | Review | View | Automate | Help | PDFelement

Clipboard | Font | Alignment | Number | Styles | Cells | Editing | Analysis | Sensitivity | Add-ins

G8 | X | ✓ | fx

	A	B	C	D	E	F	G	H	I	J	K
1	Oro Site High School										
2	Student Count for Each Room										
3											
4	Room Number	No. of Students	Room Condition								
5	Room 1	20	Okay								
6	Room 2	31	Okay								
7	Room 3		Okay								
8	Room 4	21	Okay								
9	Room 5	0	Under Renovation								
10	Count	4									

Count=

10

11

The resulting number is 4 because B7 is not counted since it does not contain any value.

COUNTIF () Function

- The **COUNTIF () Function** counts the number of cells within a range that meet the given criteria
- The basic format of this function is **=COUNTIF(range,criteria)**

A	B	B	AB	O
O	O	B	AB	B

Useful Microsoft Excel Features

Conditional Formatting

- This feature enables users to emphasize certain cells with the formatting they want.
- For example, if one wants to highlight all the cells which have values higher than a specified value, conditional formatting can be used.

Task: Add customized formatting to the branch's daily sales which are less than Php 2,000

	A	B	C
1	Sales Report		
2			
3	Branch	Date	Sales
4	Manila	01/05/2020	1,500.00

Text to Columns Feature

- This feature is used to separate contents of one column to two or more columns.
- This is useful in case when there is a need to separate last names and first names into two columns.

Task: Separate the last name and first name of the students.

Convert Text to Columns Wizard - Step 1 of 3

The Text Wizard has determined that your data is Delimited.

If this is correct, choose Next, or choose the data type that best describes your data.

Original data type

Choose the file type that best describes your data:

☒ Delimited

- Characters such as commas or tabs separate each field.

☐ Fixed width

- Fields are aligned in columns with spaces between each field.

Preview of selected data:

3

Abalita, Jaybee O.

4

Aguilar, Marc Joshua N.

5

Alfuentes, John Gregory T.

6

Archin, Paul Austin T.

7

Ayala, Russel A.

Cancel

< Back

Next >

Finish

Step 3: Choose Delimited since we will use specific values or characters as delimiters. Click, Next.

Insurance	1, 500.00
Personal Care	600.00
Entertainment	500.00
Miscellaneous	490.00
Car Expenses	2,000.00
Business Expenses	6, 000.00

TASKS

1. Get the total income of Maria using the sum function.
2. Get the total expenses of Maria using the sum function.

TASKS

Using the **Conditional Formatting** feature:

3. Highlight (red) Maria's expenses amounting to Php 3,000 and above.
4. Highlight (yellow) Maria's expenses amounting to Php 3,000 and below.

TASKS

5. Add another sheet on your workbook and label it as Financial Summary.

- On A1, type in Financial Summary.
- On A3, type in Total Monthly Income.
- On A4, type in Total Monthly Expenses.
- On A5, type in Cash Remaining.

TASKS

5. Add another sheet on your workbook and label it as Financial Summary.

- On B3, type in the amount you computed for the Total Monthly Income.
- On B4, type in the amount you computed for the Total Monthly Expenses.
- On B5, compute for the Cash Remaining using the formula $(=B3 - B5)$

TASKS

6. Show Maria's Financial Summary using a Pie Chart.
