Getting to Know Word Processing

Empowerment Technologies

Senior High School Applied - Academic

Given that you understand computer fundamentals,
what is the first important computer skill
that a student should learn?

What can you say about the statement below?

“Composing, editing, and formatting text can be both your tool and your weapon in the world.”

Learning Objectives

At the end of the lesson you should be able to:

- Understand what word processing is.
- Appreciate the importance of having word processing skills.
- Identify the basic features of a word processor.

This table specifies the usual documents that
a person composes on a computer.
With a partner, fill in the missing parts.

Creator		Composition
1.	Student	University Application Letter
2.		Lesson Plan
3.	Suitor	
4.		Birthday Invitation
5.	Music Composer	

This table specifies the usual documents that
a person composes on a computer.
With a partner, fill in the missing parts.

Creator	Composition
6.	Minutes-of-the-Meeting
7. Scientist	
8.	Medical Prescription
9. Chef	
10.	Lifestyle Blog

This table specifies the usual documents that a person composes on a computer.
With a partner, fill in the missing parts.

Creator		Composition
11.	Businessman	
12.		Movie Script
13.	Author	
14.		Resume
15.		Mental Health Case Study

1. Do you think every kind of work requires the use of a computer?
Why or why not?

2. What are the common types of software that you use on your computer?

What is a word processor?

A **word processor** is a type of software that enables the user to create, edit, and format text using various tools.

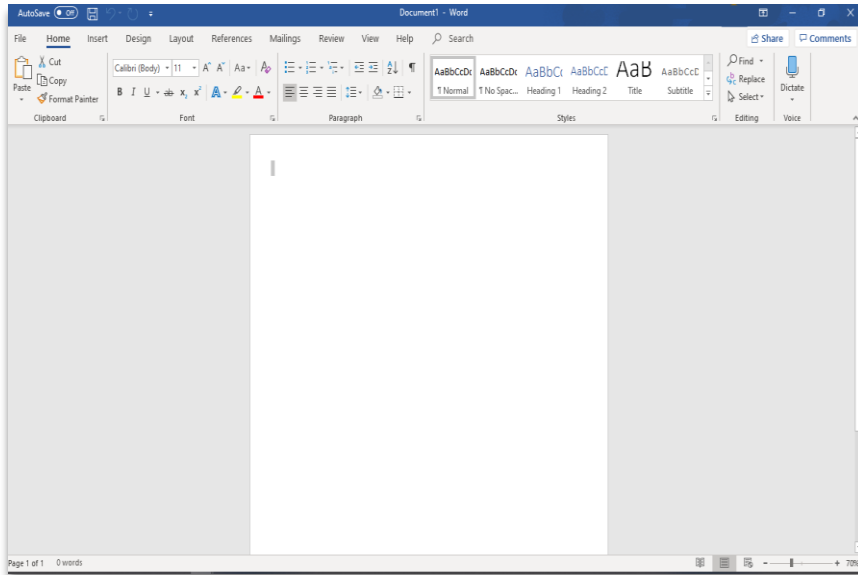

Word Processors

It enables users to produce documents that consist of text and graphics.

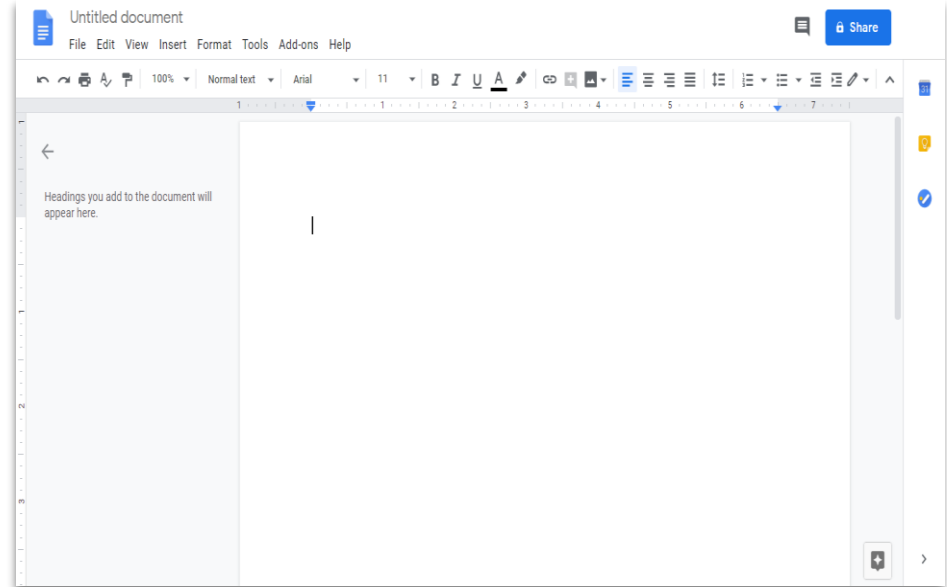

It is widely used in different kinds of industries.

Examples of Word Processing Software

Microsoft Word

Google Docs

Aside from a computer or laptop,
we can also use these word
processors with our **mobile
devices.**

Word Processing Skills

Various typing tasks require us to be adept at producing text efficiently depending on its purpose.

Basic Word Processing Skills

- Keyboard and User Interface Familiarization
- Typing Speed and Accuracy
- Page Layouting
- Text Formatting
- Inserting Objects

Word processing software has varied **features**.

Frequent practice will develop familiarization and understanding.

Word Processor: **Standard Features**

Insert - adds objects such as tables, images, and shapes.

Delete - removes text or object from the document.

Cut - deletes chosen data from the page and keeps it on the clipboard.

Copy - keeps data on the clipboard.

Word Processor: **Standard Features**

Paste - places copied data on chosen field.

Page Setup - sets the layout of the entire document.

Find - tool to search for a string of text and to provide an option to replace it with another.

Word Processor: **Standard Features**

Word Wrap - formats the alignment of your text and object/s.

Print - produces a hard copy of the document when connected to a printer.

File - lets the user manage the document using functions such as save, print, and open.

Word Processor: **Standard Features**

Font - allows the user to personalize the style and size of the text.

Windows - permits multiple screens for users to work on.

Spell Check - prompts the user for words spelled differently from the built-in dictionary.

Some word processors offer tools that are way beyond the standard features to cater to experienced users.

Word Processor: **Additional Features**

Grammar Check - prompts the user for sentence construction that does not meet the grammar rules set by the software.

Footnotes - provides further information about the document.

- — **Automated List** - adds numbering or
- —
- — bullets to your list of text.

Word Processor: **Additional Features**

Graphics - allows the user to insert objects such as diagrams, images, or shapes.

Header and Footer - permits customization of the top and bottom part of the document page.

Paragraph Layout - adjusts the indentation and spacing of a paragraph.

Word Processor: **Additional Features**

Macros - allows the user to automate templates or patterns for your document.

Mail Merge - lets the user send out letters or documents in bulk to different recipients.

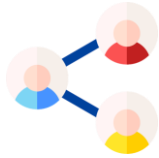

Table of Contents and Index - lists topics included in the document.

Word Processor: **Additional Features**

Thesaurus - built-in synonym provider.

Collaboration - allows multiple editors to access the document online.

Internet Features - provides links to external sources via the Internet.

Translation and Speech- voice commands, text reading, and translation.

Can you recall a scenario in which you used a word processor for a school task or project?

Exercise 1: Recall the Terms

On each cell, write down as many terms as you can recall from the topic.

Exercise 1: Recall the Terms

Standard Word Processor Features	Additional Word Processor Features	Word Processing Skills

Exercise 2: Numbers to Shapes

In this exercise, the numbers indicate the terms and the shapes state definitions. Match each number with its corresponding shapes.

Exercise 2A: Numbers to Shapes

1. Paste		Produces a hard copy of your document when connected to a printer.
2. Page Setup		Prompts you for words spelled differently from the built-in dictionary.
3. Print		Permits multiple screens for you to work on.
4. Windows		Places copied data on chosen field.
5. Spell Check		Sets the layout of your entire document.

Exercise 2B: Numbers to Shapes

1. Footnotes		Provides further information about your document.
2. Graphics		Allows you to automate templates or patterns for your document.
3. Macros		Allows you to insert objects such as diagrams, images, or shapes.
4. Thesaurus		Allows multiple editors to access the document online.
5. Collaboration		Built-in synonym provider.

Something to ponder:
Based on your own
understanding, what is
word processing
software?

Mail Merge and Label Generation

Technology has offered people diverse ways to communicate creatively and produce efficiently in the simplest manner.

How do we define **Mail Merge?**

Mail Merge

Mail Merge is a powerful tool that combines customized documents with another file from a data source.

Mail Merge

This feature offers personalized

- Labels
- Tags
- Certificates
- Emails
- Directories
- Letters
- Envelopes

Two Parts of a Mail Merge

Main Document

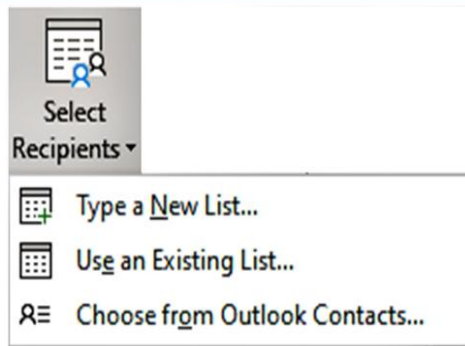

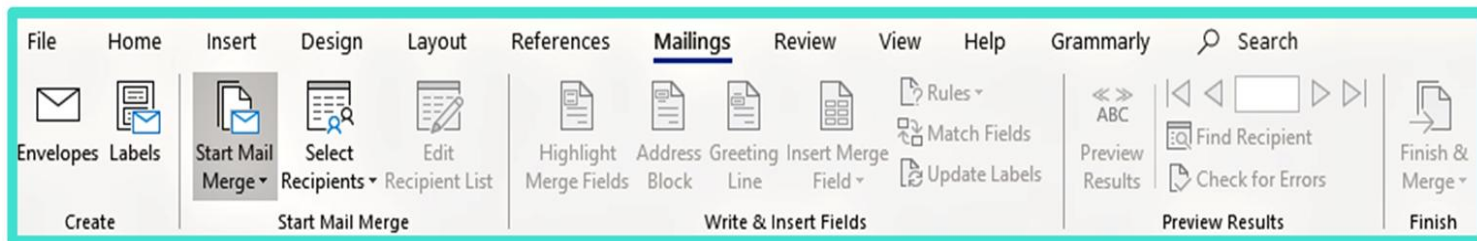

As the name suggests, it refers to the content or template of the mail.

Recipient List

Refers to the data source or record of names, addresses, and selected information that can be customized by the user.

Mail Merge: Creating Recipient List

Mail Merge: Creating Recipient List

- Click the **Mailings** Tab.
- On the Mailings ribbon, click **Select Recipients**.
- There are two usual options following this step:
Option 1: **Type New List** or
Option 2: **Use an Existing List**

Creating Recipient List: Type New List

Fill in the details on the row and click **New Entry** to add recipients. You may also customize the column values.

New Address List

Type recipient information in the table. To add more entries, click New Entry.

Title	First Name	Last Name	Company Name	Address Line 1

New Entry Find... Delete Entry Customize Columns... OK Cancel

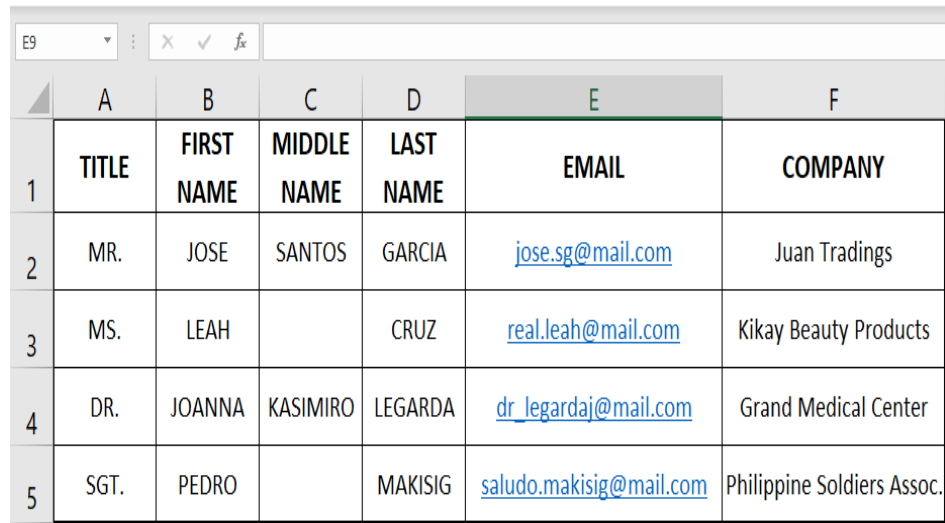

New Address List Dialogue Box

Creating Recipient List: Use an Existing List

Open **Excel**, then type in your preferred values in the first row and your recipients' details in the succeeding rows.

Save the document.

The screenshot shows an Excel spreadsheet with the following data:

	A	B	C	D	E	F
	TITLE	FIRST NAME	MIDDLE NAME	LAST NAME	EMAIL	COMPANY
1	MR.	JOSE	SANTOS	GARCIA	jose.sg@mail.com	Juan Tradings
2	MS.	LEAH		CRUZ	real.leah@mail.com	Kikay Beauty Products
3	DR.	JOANNA	KASIMIRO	LEGARDA	dr_legardaj@mail.com	Grand Medical Center
4	SGT.	PEDRO		MAKISIG	saludo.makisig@mail.com	Philippine Soldiers Assoc.

Creating the list using spreadsheet.

Would you recommend mail merge to your friends? Why or why not?

Mail Merge: Launch the Mail Merge Wizard

- Click **Start Mail Merge** on the Mailings ribbon and select **Mail Merge Wizard**.
- A column box will appear on the right side of the screen with a step-by-step guide.
- Select the **document type** that you will be using.

Mail Merge: Launch the Mail Merge Wizard

Document types:

- Letters - customized greetings
- Email - a Word to email content
- Envelopes or Labels - similar to a stamp indicating names and address from the recipient list
- Directory - serves as a contact list

Mail Merge: Launch the Mail Merge Wizard

- Create your template or **Main Document**.
- Select your recipient from the previous step.
- Select the **Insert Fields** that you want to place on your document.
- Preview your letter.
- Make necessary changes.
- Print your document.

Conceptualize your desired output first.

Be sure to gather needed information and have a layout in mind before mail merging.

Labels

Labels are used on envelopes together with the document created during the mail merge. It may also be used for different things such as name tags or gift tags.

Creating Labels

- Choose between **Envelope** or **Label**.
- **Option 1:** You will have to format your label according to your preference.
- **Option 2:** You will use a template from different label vendors.
- You may include text or graphics in your label as your customization.

Creating Labels

- Add the information or fields that you wish to include from your recipient list.
- Set the proper print properties before printing the labels to avoid making a mistake.

Practice 1:

Create **SmartArt** that shows the process of doing **mail merge or label generator** in Microsoft Word.

You may submit a soft copy or hard copy to your teacher.

Practice 2

Create a **greeting card** expressing your gratitude to your classmates. Make sure that each of them will receive a copy of your card. Apply the necessary steps as discussed in the lesson.

Questions

1. What is your understanding of mail merge?

1. What are the advantages of using a mail merge?

1. Why is it considered as a powerful tool?

Why is mail merge still important despite the availability of different tools on the Internet?
